

Relation: A set of _____ **Function:** _____

Domain of a _____ is the set of _____ that is made up of all the _____ components of the ordered pairs.

Range of a _____ is the set of _____ that is made up of all the _____ components of the ordered pairs.

Domain: _____ variable, _____ Variable, _____ coordinate, _____ coordinate

Range: _____ variable, _____ Variable, _____ coordinate, _____ coordinate

M: connects a student to the department for which the student has a morning class.

C: connects a student to the department for which the student has their 1st class of the morning.

M: $\left\{ (Bill, Math), (Sue, Chem.), (Sue, Bio.), (Sue, Bus.), (Jan, Econ.), (Jan, Chem.), (Al, Chem.), (Al, Comp. Sc.), (Al, Pol.Sc.), (Jo, Pol.Sc.) \right\}$

C: $\left\{ (Bill, Math), (Sue, Chem.), (Jan, Business), (Al, Chem.), (Jo, Political Sc.) \right\}$

Domain of M and C: _____

Range of M: _____

Range of C: _____

Both **M** and **C** are relations, however only _____ is a function.

Mathematical Functions are often given by a rule: $f(x)$ is read f "of" x

EX) $f(x) = 5x - 2$

What output corresponds to an input of 8?

What input corresponds to an output of 8?

$x = 8$ determine $f(8)$.

$f(x) = 8$, determine the value of x

What is the output of f if the input is $w + 2$?

Domain _____ Range _____

Vertical Line Test _____

$$f(x) = |x| \Rightarrow f(x) = \begin{cases} -x, & x < 0 \\ x, & x \geq 0 \end{cases}$$

$$f(-2) = \underline{\hspace{2cm}} \quad f(x) = 3 \underline{\hspace{2cm}}$$

Domain _____ Range _____

$$g(x) = \begin{cases} -x, & x \leq -1 \\ 1, & -1 < x < 1 \\ (x-1)^2, & x \geq 1 \end{cases}$$

$$f(1) = \underline{\hspace{2cm}} \quad f(x) = 1 \underline{\hspace{2cm}}$$

Domain _____ Range _____

****Unless stipulated the domain of functions given by a rule will be all possible real numbers for which the function is defined.**

$$g(x) = \frac{12}{x-5}, \quad \text{Domain in set notation } \underline{\hspace{2cm}} \quad f(x) = \sqrt{x+4}, \quad \text{Domain in set notation } \underline{\hspace{2cm}}$$

$$\text{interval notation } \underline{\hspace{2cm}} \quad \text{interval notation } \underline{\hspace{2cm}}$$

State the Domain

State the Range

$$f(0) = \underline{\hspace{2cm}} \quad f(-2) = \underline{\hspace{2cm}} \quad f(5) = \underline{\hspace{2cm}}$$

What is x if g(x) = 0?

What is x if g(x) = 6?

Examples of Relations that are not Functions:

x-intercept _____

y-intercept _____
